

# FREEON

Loaded with phenomenal design and advanced ergonomic features, FREEON™ has been engineered with a revolutionary aerospace aluminum alloy (Kynetium™) which combines Magnesium, Silicon and Titanium; the refined mixture of lightness (mg), strength (ti) and elasticity (si), designed to take extraordinary pressures and stresses involved in high altitude flying, has been successfully merged into a stunning wraparound carbonium frame, incorporating fully adjustable Ergonose II™ and Quick Change™ interchangeable lens system. Soft and adjustable rubber temples increase Freeon's comfort finetuning and insure stability.
