

## GOLF SERIES

In keeping with our commitment to expand our golf market, Rudy Project has created seven (7) cutting edge glasses: Exception Golf, Kalyos Golf, Kabrio Golf, Ketyum Golf 2, Freeon Golf 2, Rydon Golf 2, and Perception Golf 2, that each offer technical solutions to problems golfers encounter during play. Each golfer can now choose the best sunglass to meet his needs - whether it be prescription, eliminate fogging, creating a maximum field of vision, offer extraordinary lightweight solutions or interchangeability to manage changing light conditions. All of Rudy's golf glasses come with two lenses to manage most any light condition during play.

### GOLF 100™

Golf 100™ lenses provide a unique balance of target and background brightness. The transmission of 25% was tailored to accommodate for grass reflecting only a low amount on incident light. While controlling low level blue light, the middle range is selectively manipulated to provide optimum visual stimulation and distinctive "object illumination".
