

KABRIO flip-up

By bringing the KABRIO™ to reality, our craftsmen have redefined the limits of optical innovation ahead of contemporary boundaries. This unique piece of eyewear has been forged around pure technological refinement, advanced light conditions management, slender design and human ergonomics requirements: while Kabrio's half rimless eyewear architecture allows full RX-ability and unsurpassed comfort on a pure titanium platform (optional), its user-friendly solar adapter enables you to instantly see clearly when light conditions change dramatically by flipping up the adapter. Once free of its solar appendix, Kabrio™ reveals the subtle elegance and the comfortable solutions of a full RP optical platform: 360° adjustable temple tips, resilient silicon nose pads, spring hinges and titanium structure. Kabrio™ - unique optical reliability and sculptural comfort with innovative convertible features. Are you ready for Rudy?
