

RYDON

Unifying seamlessly advanced design technology and materials science, the RYDON™ blends cutting-edge ergonomic features with advanced materials (Carbon, Aluminum, Magnesium, Siliconium and Titanium) to create a super-lightweight, versatile, high performance sunglass. Rydon™ has been uniquely engineered with a carbonium frame and revolutionary aerospace aluminum alloy (Kynetium™) temples which combine Magnesium, Siliconium and Titanium to create an unbelievably lightweight (mg), durable (ti) and flexible (si) sunglass. These material advances allowed for the design specifications to be "pushed" giving our engineers the ability to create a stunning wraparound masterpiece.

Kynetium

Adjustable temple with end in Megol® for a perfect fit everytime.

Composite plastic material mixed with advanced carbon, offers a lightweight, durable technical platform.

KYNETIUM™ temples – a special alloy in aluminum that contains magnesium, siliconium and titanium that is lightweight and flexible.

RP-D-CENTERED™, RP Optics™ lenses provides maximum UV protection and optical clarity.

Optical-quality Polycarbonate UV 400 Protection lenses.

Quick Change™ interchangeable lenses system to manage any light condition with ease.

ERGONOSE™ II. Made from copper-beryllium, it is the latest advance in nose piece technology. The Ergonose II contains a number of enhancements including full adjustability, aerated Megol® nose pads with the new E-Lock™ Grip System and a unique design to ensure maximum comfort and eliminate any slippage.

FEATURES

■ 3FX VERSION (see page 12) ■ RX OPTICAL ADAPTER VERSION (see page 60)
