

RX INSERTS

For our more technical sunglasses (KETYUM™, RYDON SX™, RYDON™, EKYNOS SX™, KALYOS™, WIZAARD™) that cannot support a direct in frame RX, Rudy Project has created CLIP-ON RX optical inserts that can be snapped in behind the polycarbonate Rudy Project lenses. Thanks to our patented 'easy-in easy-out' system; our Clips can be inserted or removed with ease. This is particularly useful when you want to wear your contact lenses or when cleaning.

SUGGESTIONS FOR CORRECT INSTALLATION OF THE PRESCRIPTION LENSES IN OUR OPTICAL / CLIP-ON INSERTS.

WHAT ABOUT PRESCRIPTION LENS WEARERS?

- If you do not have access to the reference template supplied in the package with the clip-on, use the false lens.
- The distance between pupil and clip-on lens is never the same as between the pupil and the lens of the prescription glasses.
- For the inter-pupil distance measure the optical axes with the clip-on fitted on the glasses.
- Always ask your customers for valid prescription from the eye doctor within the last two years. The prescription must contain a valid reading for sphere and pupil distance (PD).
- We recommend polycarbonate aspherical prescription lenses, because they are particularly lightweight and resistant and therefore highly suitable for sports use.
- An anti-reflection treatment applied to the Rx lenses may optimize vision. Some manufacturers offer nowadays advanced prescription lens materials with extremely low thickness. These allow high prescription index settings and higher optical comfort. Ask your lens provider for more informations.
- Warning: Perception's clip-on is made out of Grilamid TR90 and should not be overheated ! (or very slightly - low melting point!) to fit the prescriptions.
- Lenses should be inserted playing with the elasticity of the material.
- Same technique applied with Direct Rx on plastic frames.

Almost every pair of Rudy Project sunglasses is Rx-friendly. Consult page 107 for other rx-able Rudy Project sunglasses. Now you can wear Rudy's technically advanced sunglasses while enjoying perfect vision. Just ask your practitioner for more details or call your local Rudy Project agent.

For further information ask for our advanced technical guide **RX PROJECT**.
